

General Operations of the Assault Tactical Throat Microphone

1. Turn radio off before connecting any microphone or headset.
2. The connector cord and the push to talk module have male/female quick disconnect ports that need to be carefully lined up before being attached. DO NOT force the quick release connectors together as you may damage the pins. Use light force and twist until you find the sweet spot.
3. Connect the Assault throat microphone to the remaining connector on the PTT.
4. To mount the throat mic. Gently spread the neck band and mount from behind the neck and place the mics toward the front of the neck.
5. The neckband can be adjusted by pulling gently on the neckband to expand the size. Each person needs to locate the best position for the microphones as every persons sweet spot is different.

ASSAULT THROAT MICROPHONE MANUAL

6. The earpiece can be worn on either ear by simply turning the throat microphone over.
7. Place the earbud into the ear with the clear tube earpiece going in front of the ear and up and over for secure fit.
8. Attach the radio connector to the radio according to manufactures instructions and SLOWLY turn the volume up to a comfortable level.
9. To transmit, depress the PTT in most center spot of the easy to locate PTT button.
10. The heavy duty swivel clip can be attached to your clothing or easily fed through a vest or molle system.
11. To ensure the life of the Assault microphone wipe it clean after every use. Do not use soap or cleaning chemicals. To clean a clogged acoustic tube simply remove the acoustic tube and soak it in a glass of warm water(not hot) for 10 minutes. Use an air can to dry and blow out any additional debris and water from the tube.

Make sure there is nothing wrong with your radio by trying the headset with another fully charged radio. If the acoustic tube earpiece has debris inside of it the sound quality will diminish unless the acoustic tube is cleaned or replaced.

Trouble Shooting:

Please contact Code Red Headsets if you have any issues. You must request a RMA number from Sales@CodeRedHeadsets.com or call 858-486-9859 before you ship the item to us.

One Year Limited Warranty Information:
