

Styles of Earpieces:

All of our lapel microphones, tactical headsets, listen-only earpieces, shoulder mics have high quality Kevlar reinforced cables and 1-Year Warranties.

LISTEN ONLY EARPIECES

We have four types of earpieces that work with with all major brands of shoulder speaker microphones. All of our earpieces are pliable (i.e. they can be worn on either ear). An earpiece doesn't have a microphone on it.

- SILENT** - Clear Tube + bonus pack
- GUARD** - Soft Hook
- SHIELD** - D-Ring
- CREW** - Swivel Earpiece

Each is available in two different coiled cord lengths:
Junior 14 inch and long 26 inch.

There are 3 connector choices:

- 2.5mm** works with Kenwood, Otto, and Harris speaker mics.
- 3.5mm** works with Code Red Headsets, Motorola, and other brands of speaker mics.
- M2** (Threaded 3.5mm) long cord works with Motorola speaker mic with earpiece port on the adapter..

EXAMPLE:

This is a SILENT JR 3.5 14" listen-only earpiece showing how it connects to our SIGNAL 21 speaker mic 3.5mm audio port.

SELLING TIP:

Our earpieces diverts audio to the ear and keeps conversations private from the public!

LAPEL SURVEILLANCE MICROPHONES

- INVESTIGATOR** - Two Wire Clear Tube Mic
- SHERLOCK** - One Wire Clear Tube Mic
- RECRUIT** - One Wire Economy Clear Tube Mic
- WATCHMAN** - One Wire Soft Hook Mic
- QUEST** - One Wire D-Ring Mic

* Quick Disconnect (QD) is available for nearly all Code Red Headsets lapel microphones.

QD-M3 quick disconnect (QD) adapter pictured.

The 2-wire microphones are most popular with police officers because they have longer cords that can be fed through their uniforms. The push-to-talk (PTT) is on a separate cord and can be fed through the front of clothing or in through the sleeve.

The one wire microphones have a slightly shorter cord than a two wire mic. One wire mics can only be fed through the front of clothing.
