

CODE RED NX PTT PRODUCT LINE

Be in control of your tactical team with the new NX PTT. Available in Single or Dual PTT channels. Can listen up to 4 radio channels simultaneously depending on radio using our NX Dual PTT.

Our Code Red NX PTT's feature a Nexus connector (not compatible with our modular series) wired to US NATO standard. The NX PTT features a constructed metal military grade design, waterproof connection (IP67) submersible PTT and a metal alligator clip affixes to uniform or clothing.

INDUSTRY USAGE

The NX PTT line is our newest and popular line from Code Red. It's compact and professional construction is made to withstand most harsh environments on the field. The versatility of our NX PTT's can be assembled using our codeRED NX and PRO series headsets; which can be used in Military, Law Enforcement, SWAT and Airsoft. The NX PTT can also be used with Peltor and MSA Sordin headsets that use a TP-120 / U-174 US NATO standard connection.

DUAL CHANNEL BASICS

The concept of a Dual PTT is simple: you have two separate radio channels you want to monitor simultaneously while wearing a single headset and communicate using a single microphone.

The most common usage is on a tactical team where someone at supervisory level may need to support 2 or more teams in the field working in a coordinated fashion. Other examples might be a large-scale response to an emergency spread over a large geographic area or, in the military, the ability to coordinate an aerial strike with ground troops in the same general vicinity. In the corporate or academic security worlds might be the supervision of a security force on a large campus. Fundamentally, a single person may need to have instantaneous communication with similar, but separate, teams and control those resources.

codeRED

**GET THE UNFAIR
ADVANTAGE**

NX PTT

Code Red NX PTT's are a constructed military grade design, not a plastic consumer grade device. The metal alligator clip affixes to uniform/clothing. Both NX PTTs have a Molle clip that can be reversed to be used on left or right side of vest. The NX PTT connection to the headset is waterproof, with a rating of IP67. Can handle watery terrain.

Our NX PTT's can be combined with our PRO/NX Series, Peltor and MSA Sordin headsets that use a US Nato Standard TP-120 / U-174 connection.

NX PTT SINGLE

The NX Single PTT features a Nexus connector (not compatible with our modular series) wired to US NATO standard. Features 1 PTT button and download for a single two-way radio.

NX DUAL PTT

The NX Dual PTT features a Nexus connector (not compatible with our modular series) wired to US NATO standard. Features 2 PTT buttons and 2 downloads for two separate two-way radios. Listen up to 4 channels depending on the radio.

NX DUAL PTT K-B

The NX Dual PTT K-B features a Nexus connector (not compatible with our modular series) wired to US NATO standard. Features 2 PTT buttons and a single download for the Baofeng UV-82HP radio. Grey is Channel A, Black is Channel B.

ADAPTER CONFIGURATIONS

Using our existing Quick Disconnect Adapters, we are able to offer extended connectors on our NX PTT line.

Now available for connectors: K, M, K2, M3, M4, M7, & M12

Like most Baofeng radios, the UV-82HP has a Dual Channel Monitoring Mode. It comes with a dual PTT so you do not have to switch the A/B channel button to communicate on the 2 channels.

NX PTT HEADSETS

Our NX PTT's and Headsets can be purchased individually to configure a custom personalized configuration. Using the TP-120 / U-174 US Standard NATO Connection, Peltor and MSA Sordin headsets can work seamlessly with our NX PTT's.

PRO TACTICAL TEAMS

TBCH-PRO-B/M NX BONE CONDUCTION SPEAKER

Bone Conduction allows you to keep your ears open to have perfect situational awareness, while the Boom Mic gives optimal transmission in high noise situations.

TBCH-PRO-S/R NX BONE CONDUCTION SPEAKERS

Bone Conduction allows you to keep your ears open to have perfect situational awareness, with the addition of a Bone Conduction Microphone so you can still communicate while wearing a gas mask or SCBA.

CQB NX SPEAKER WITH BOOM MIC

Single Speaker allows you to keep one ear open to promote situational awareness, while the Boom Mic gives optimal transmission in high noise situations.

BATTLE ZERO NX BONE CONDUCTION SPEAKERS

Bone Conduction allows you to keep your ears open to have perfect situational awareness, with the addition of a Bone Conduction Microphone so you can still communicate while wearing a gas mask or SCBA.

ASSAULT-PRO NX TACTICAL THROAT MIC

Best for stealth situations, throat mics will allow the user to communicate with a whisper in low noise situations to keep your location and communications covert.

TECH TIP:

Need to switch your PTT to a more convenient side? Simply remove the screws on the Molle clip and reattach on the opposite side.

NX ACCESSORIES

We have developed accessories to go with our NX PTT's that use a TP-120/ U-174 US Standard NATO Connection. These accessories can be used with our NX, Pro Series, Peltor and MSA Sordin headsets.

MRC-NX JACK

The MRC-NX jack allows you to plug in a Pro Series, NX Series, Peltor/M-SA/OTTO headset wired to the US NATO standard into our Modular PTT and down lead.

MRC-NX PLUG

The MRC-NX Plug adapter allows you to plug our Modular series PTT into any device that uses the Nexus connector wired to the US NATO standard.

MRC-NX 3.5

Adapter cord Nexus female to 3.5mm for iPhones or mobile devices using a 3.5 mm connection. The MRC-NX-3.5 adapts our codeRED NX and PRO series headsets for use with iPhone (with lightning adapter) or any device that uses the PC headset 3.5mm interface.
